Bergie

PORTFOLIO

Joakim Bergman

Bergie Consulting AB (Org nr. 5593666141)

The process

1

I always start by asking about the vision, the goals and if there is a SWOT for the product/project. In this way, I/we can more easily create a suitable vision, goals and SWOT for the design project we do together.

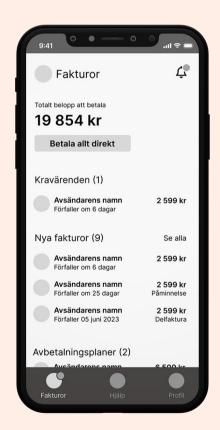

2

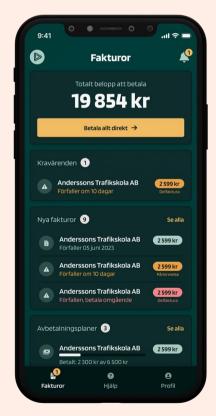

Ideas are sketched in a simple format and interactive prototypes are created for early testing. The goal is to find the right solutions before creating design components and finished design for final implementation.

3

To make it easier for developers, I use a suitable *design system* in Figma (for example MUI, Flowbite or lonic), along with plugins for *accessibility* (that the product can be used by people with disabilities).

LoFi vs HiFi

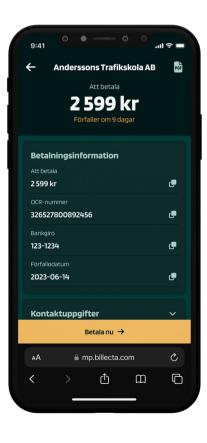

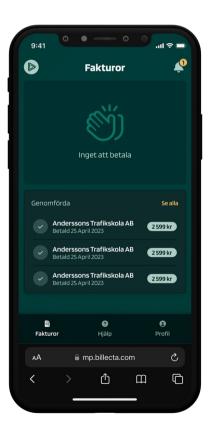

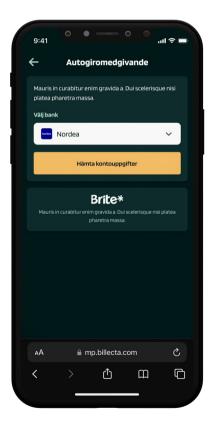

Billecta App

The graphic style is created by another designer

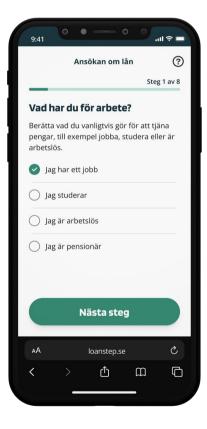

LoanStep App

The logo is created by another designer

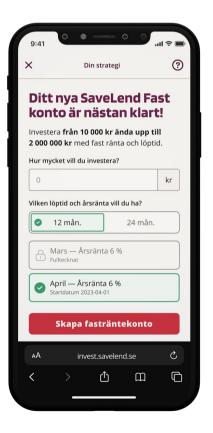

SaveLend App

The graphic style is created by another designer

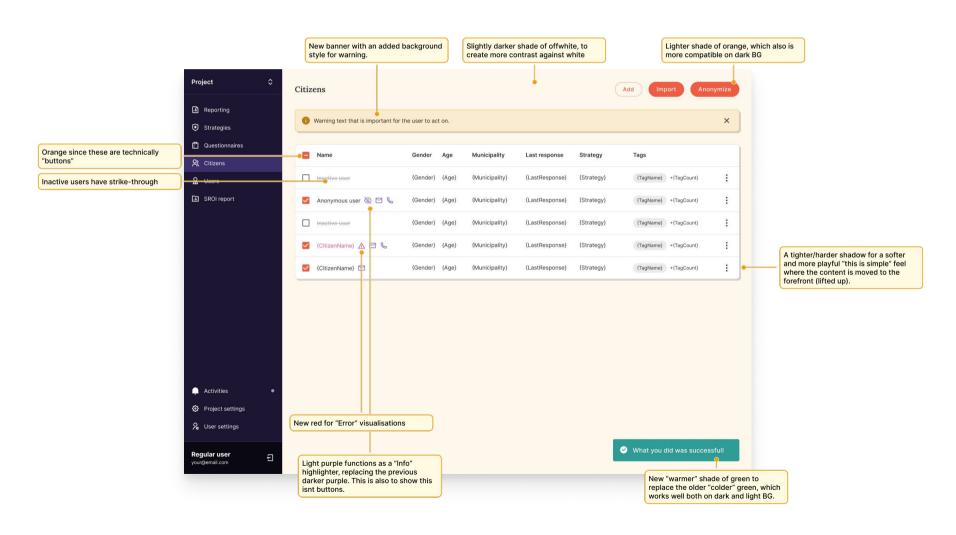

Impactly Platform

Examples where I used notes with explanations of new changes
